Skin contact Redness, inflammation
Eye contact Irritation, conjunctivitis

3. COMPOSITION / INFORMATION ON INGREDIENTS

Hazardous Component	Conc.	CAS	EINECS	ACGIH;TLV-TWA	OSHA PEL
Ethyl-2-cyanoacrylate (Ethyl cyanoacrylate)	80 – 100%	7085-85-0	230-391-5	0.2 ppm TWA	
Silicones and siloxanes, dimethyl-reaction products with silica	1 – 10%	67762-90-7	----	10 mg/m ³ TWA (inhalable dust) 3 mg/m ³ TWA (respirable fraction)	15 mg/ m ³ TWA (total dust) 5 mg/m ³ TWA (respirable fraction)
Acrylic polymer	1 -10%	----	----	----	4 mg/m ³ TWA (respirable dust) 10 mg/m ³ TWA (inhalable dust)

4. FIRST AID MEASURES

Skin contact Do not pull bonded skin apart. It may be gently peeled apart using a blunt object such as a spoon, preferably after soaking in warm, soapy water. Cyanoacrylates give off heat on solidification. In rare cases, a large drop will generate enough heat to cause a burn. Burns should be treated normally after the adhesive has been removed from the skin. If lips are accidentally stuck together, apply warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips apart with direct opposing action.

Eye contact	If the eye is bonded closed, release eyelashes with warm water by covering with wet pad. Cyanoacrylate will bond to eye protein and will cause periods of weeping which will help to debond the adhesive. Keep eye covered until debonding is complete, usually within 1-3 days. Do not force eye open. Medical advice should be sought in case solid particles of cyanoacrylate trapped behind the eyelid cause any abrasive damage.
Inhalation	If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult physician.
Ingestion	Ensure that breathing passages are not obstructed. The product will polymerize immediately in the mouth making it impossible to swallow. Saliva will slowly separate the solidified product from the mouth (several hours).

5. FIRE FIGHTING MEASURES

Extinguishing media	Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
Hazardous Product of Combustion	Carbon oxides, nitrogen oxides (NOx)
Special Firefighting Procedures	Wear self-contained breathing apparatus for firefighting if necessary.
Unusual Fire/Explosion Hazards	Use water spray to cool unopened containers.
Lower Explosive Limit	No data available / Not applicable
Upper Explosive Limit	No data available / Not applicable

6. ACCIDENTAL RELEASE MEASURES

Personal precautions	Use personal protective equipment. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.
Environmental precautions	Prevent further leakage or spillage if safe to do so. Do not let product enter drains.
Clean-up methods	Do not use cloths for mopping up. Flood with water complete polymerization and scrape off the floor. Cured material can be disposed of as non-hazardous waste.

7. HANDLING AND STORAGE

Handling	Ventilation (low level) is recommended when using large volumes. Use of dispensing equipment is recommended to minimize the risk of skin or eye contact. Wash hands before work breaks and after finishing work. Do not eat, drink or smoke while working. Good industrial hygiene practices should be observed.
Storage	For optimum shelf life, store in containers under refrigerated conditions at 2-8°C (35.6 – 46.4°F)

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering controls	Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of the work day.
Respiratory protection	Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
Skin protection	Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching gloves outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. Use impervious clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Eye/face protection	Safety glasses with side-shields conforming to EN166. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN166 (EU).
